

INDEX TO VOL. XXIX.

- A**BSORPTION, of fat in stomach, xxxvi, xxxvii.
 —, post-mortem, through lymphatics, xxx.
 Adrenalin, dilates pupil on splanchnic stimulation, xxxiv.
 —, subcutaneous and intramuscular injections, xxvi.
 Adrenal secretion, affected by asphyxia, hyperpnoea, and sensory stimulation, 274.
 Anaesthesia, ether, effect on metabolism, xvii.
 Anaesthetics, antagonism to salts, 372.
 —, antitoxic action, 372.
 —, effect on permeability, xi.
 Anaphylaxis, similarity to the effects of digitalis, xvi.
 Antithrombin, 187.
 Asphyxia, action on vasomotor centre, 100.
 AUER, J. The action of the digitalis group upon the heart and its similarity to cardiac anaphylaxis, xvi.
 AUER, J., and S. J. MELTZER. Inhibition of respiration by distention of the lungs of dogs under intratracheal insufflation, xxxii.
 AUER, J., and S. J. MELTZER. The respiratory effect of electrical stimulation of the central end of the vagus nerves in dogs under intratracheal insufflation, xxix.
BAITSELL, G. A. See WOODRUFF and BAITSELL, 147.
 Blood, coagulation, influenced by intravenous injections of thrombin, 160.
 —, —, rôle of antithrombin and thromboplastin, 187.
 —, fibrinogen, relation of liver to regeneration of, xix.
 Blood, preparation of thromboplastin extracts, 156.
 Blood pressure, falls on traction of carotid artery, xxxv.
 — —, in skin, 335.
 — —, in unanaesthetized animals, xxii.
 — —, post-haemorrhagic recovery related to peripheral resistance, 137.
 BROOKS, C. Blood pressure in the normal unanaesthetized animal under various conditions, xxii.
 BROWN, E. D., and T. SOLLMANN. The blood pressure fall produced by traction on the carotid artery, xxxv.
 BURGE, W. E. The separation of rennin and pepsin by the passage of a direct electric current, 330.
CANNON, W. B. The nature of gastric peristalsis, 250.
 CANNON, W. B. The relation of tonus to antiperistalsis in the colon, 238.
 CANNON, W. B., and R. G. HOSKINS. The effects of asphyxia, hyperpnoea, and sensory stimulation on adrenal secretion, 274.
 CANNON, W. B., and C. W. LIEB. The receptive relaxation of the stomach, 267.
 CANNON, W. B., and L. B. NICE. The effect of splanchnic stimulation on muscular fatigue, xxiv.
 CANNON, W. B., A. T. SHOHL, and W. S. WRIGHT. Emotional glycosuria, 280.
 CANNON, W. B., and A. L. WASHBURN. An explanation of hunger, 441.
 CARLSON, A. J. A method of studying the movements and the tonus of the empty digestive tract by the X-ray, xxviii.
 CARLSON, A. J. See GOULD and CARLSON, 105.

- CARLSON, A. J., and L. M. MARTIN. Contribution to the physiology of lymph. — XVII. The supposed presence of the secretion of the hypophysis in the cerebro-spinal fluid, 64.
- Carotid, traction causes fall of blood pressure, xxxv.
- CECIL, H. L. Note upon the preparation of thromboplastic extracts (thromboplastin) from tissues, 156.
- Cell division, artificial parthenogenesis in vertebrates, 298.
- Cerebro-spinal fluid, does it contain hypophyseal secretion, 64.
- Circulation, poisoning by morphine after removal of heart, xxxiv.
- COBB, P. W. The influence of illumination of the eye on visual acuity, 76.
- Compensatory movements, 367.
- COPE, O. M. The peripheral resistance as a compensatory factor in the post-hemorrhagic recovery of blood pressure, 137.
- Creatinine, elimination in artificial fever, xviii.
- , excretion in pig, 210.
- DAVIS, D. The intravenous injection of thrombin, 160.
- Diabetes, pancreatic, influenced by pancreatic extract, 306.
- Diastases, of serum and lymph, relation to diastases, 165.
- , serum, relation to kidneys, 182.
- DUNLAP, K. Palmesthetic difference sensibility for rate, 108.
- EMOTIONS cause glycosuria, 280.
- Epinephrin, effect on intestinal contractions, 363.
- ERLANGER, J. Observations on the physiology of Purkinje tissue, xxv.
- EWING, E. M., and H. C. JACKSON. A study of the second positive and second negative waves of the venous pulse, xx.
- Eye, pupil dilated by stimulation of splanchnic, probably by adrenalin, xxxiv.
- , visual acuity influenced by illumination of, 76.
- EYSTER, J. A. E. See JORDAN and EYSTER, 115.
- FAT, absorption in stomach, xxxvi, xxxvii.
- , metabolism in salmon, xxxix.
- Ferments, separation by electric current, 330.
- FERREE, C. E., and GERTRUDE RAND. The spatial values of the visual field immediately surrounding the blind spot and the question of the associative filling in of the blind spot, 398.
- Fever, metabolism, especially of creatinine, xviii.
- Fibrinogen, formed by liver, xix.
- GARREY, W. E. Heart block produced by compressing the heart nerves of *Limulus polyphemus*, xxi.
- GESELL, R. A. Auricular systole and its relation to ventricular output, 32.
- GITHENS, T. S., and S. J. MELTZER. The effect of the removal of the heart upon the appearance of convulsions in frogs, xxxiv.
- Glycosuria, emotional, 280.
- , relation of adrenal glands to sugar production by the liver, 417.
- GOULD, L. K., and A. J. CARLSON. Further studies on the relation of the pancreas to the serum and lymph diastases, 165.
- GREENE, C. W. The absorption of fat by the salmon stomach, xxxvi.
- GREENE, C. W. The absorption of fat in the salmon muscular tissue and its resorption during the migration fast, xxxix.
- GREENE, C. W., and W. F. SKAER. Absorption of fat by the mammalian stomach, xxxvii.
- Growth, rôle of proteins in, xii.
- HAGAN, H. H., and J. K. ORMOND. The relation of calcium to the cardio-inhibitory function of the vagus, xi.
- HANZLIK, P. J. See SOLLMANN and HANZLIK, xxx.
- HAWK, P. B. See HOWE and HAWK, xiv.
- HAWK, P. B. See ROSS and HAWK, xvii.
- Heart, action of digitalis group on, xvi.
- , block, by compression of heart nerves, xxi.
- , method for study of vasomotor nerves in, xxi.
- , Purkinje tissue, xxv.
- , relation of calcium to cardio-inhibitory function of vagus, xi.
- , ventricular output and auricular systole, 32.
- Hemorrhage, recovery of blood pressure, 137.

- HENDERSON, Y., and D. G. RUSSELL. A simple method for determining the carbon dioxide content of the alveolar air by means of baryta, 436.
- HOSKINS, R. G. The sthenic effect of epinephrin upon intestine, 363.
- HOSKINS, R. G. See CANNON and HOSKINS, 274.
- HOWE, P. E., and P. B. HAWK. A comparison of the data from two fasts each exceeding one hundred days in length and made upon the same subject, xiv.
- HOWELL, W. H. The rôle of antithrombin and thromboplastin (thromboplastic substance) in the coagulation of blood, 187.
- Hunger, 441, xiv.
- , metabolism in, xiv.
- I**NJECTIONS, subcutaneous and intramuscular, xxvi.
- Intestine, contractions influenced by epinephrin, 363.
- , movements of, 238.
- J**ACKSON, D. E. A note on the pharmacological action of vanadium, xxiii.
- JACKSON, H. C. See EWING and JACKSON, 1xx.
- JORDAN, H. E., and J. A. E. EYSTER. The physiological action of extracts of the pineal body, 115.
- JOSEPH, D. R., and S. J. MELTZER. Contributions to our knowledge of the action of sodium and calcium upon the direct and indirect irritability of the muscles of the frog, 1.
- JOSEPH, D. R., and S. J. MELTZER. The effect of stimulation of the peripheral end of the splanchnic nerves upon the pupil, xxxiv.
- K**IDNEYS, relation to concentration of serum diastase, 182.
- KLEINER, I. S., and S. J. MELTZER. A comparison of the effects of subcutaneous and intramuscular injections of adrenalin upon the production of glycosuria, xxvi.
- L**IEB, C. W. See CANNON and LIEB, 267.
- LILLIE, R. S. Antagonism between salts and anæsthetics. — I. On the conditions of the antistimulating action of anæsthetics with observations on their protective or antitoxic action, 372.
- Liver, effect of Eck's fistula on bile formation, xxvii.
- , forms fibrinogen, xix.
- , sugar, its production affected by the adrenal glands, 419.
- LOMBARD, W. P. The blood pressure in the arterioles, capillaries, and small veins of the human skin, 335.
- LUSK, G. See WILLIAMS, RICHIE, and LUSK, xxxiii.
- Lymph, diastases, relation to pancreas, 165.
- , hypophyseal secretion in cerebrospinal fluid, 64.
- M**ACLEOD, J. J. R., and R. G. PEARCE. Studies in experimental glycosuria. — VIII. The relationship of the adrenal glands to sugar production by the liver, 419.
- Magnetic field, influence on visual sensations, 124.
- MAGNUSSON, C. E., and H. C. STEVENS. Visual sensations caused by changes in the strength of a magnetic field, 124.
- MARTIN, L. M. See CARLSON and MARTIN, 64.
- MATTHEWS, S. A. The effect of Eck's fistula on the formation of bile, xxvii.
- MAXWELL, S. S. On the exciting cause of compensatory movements, 367.
- MCCLENDON, J. F. An attempt toward the physical chemistry of the production of one-eyed monstrosities, 289.
- MCCLENDON, J. F. Dynamics of cell division. — III. Artificial parthenogenesis in vertebrates, 298.
- MCCLENDON, J. F. The increased permeability of striated muscle to ions during contraction, 302.
- MCCOLLUM, E. V. Notes on the creatinine excretion of the pig, 210.
- MCCOLLUM, E. V. The nature of the repair processes in protein metabolism, 215.
- MCGUIGAN, H. See MOSTROM and MCGUIGAN, xxxv.
- MEEK, W. J. Relation of the liver to regeneration of fibrinogen, xix.
- MEIGS, E. B. Microscopic studies of living smooth muscle, 317, xiv.
- MEIGS, E. B. See RYAN and MEIGS, xiv.
- MELTZER, S. J. See ACER and MELTZER, xxix, xxxii.
- MELTZER, S. J. See GITHENS and MELTZER, xxxiv.

- MELTZER, S. J. See JOSEPH and MELTZER, I, xxxiv.
- MELTZER, S. J. See KLEINER and MELTZER, xxvi.
- MENDEL, L. B. See OSBORNE and MENDEL, xii.
- Metabolism, amino-acids, xxxviii.
- , effect of Eck's fistula on bile formation, xxvii.
- , fat, in salmon, xxxix.
- , glycosuria, affected by adrenalin, xxvi.
- , hourly, xxxiii.
- , in artificial fever, xviii.
- , in ether anesthesia, xvii.
- , in fasting dog, xiv.
- , protein, 215, xii.
- , relation of adrenal glands to sugar production by the liver, 419.
- , repair processes in, 215.
- , rôle of creatinine, 210.
- Monstrosities, physical chemistry of their production, 289.
- MOSTROM, H. T., and H. McGUIGAN. Studies on the convulsive reflex produced by strychnine, xxxv.
- Muscle, decrease in volume during contraction, xiv.
- , fatigue, relation to splanchnic stimulation, xxiv.
- , irritability affected by sodium and calcium, 1.
- , smooth, composition of ash, xv.
- , —, structure of, 317.
- , striated, permeability to ions during contraction, 302.
- , tonus, in colon, 238.
- MUSTARD, H. J. A study of certain tonic and reflex nervous impulses as factors in parathyroid tetany, 311.
- MYERS, V. C., and G. O. VOLOVIC. Metabolism in an experimental fever with special reference to the creatinine elimination, xviii.
- NERVE, vagus, influence on respiration, xxix.
- NICE, L. B. See CANNON and NICE, xxiv.
- ORMOND, J. K. See HAGAN and ORMOND, xi.
- OSBORNE, T. B., and L. B. MENDEL. The rôle of proteins in growth, xii.
- OSTERHAUT, W. J. V. The effect of anesthetics on permeability, xi.
- PALMESTHETIC difference sensibility for rate, 108.
- Pancreas, extracts of, influence on experimental diabetes, 300.
- , relation to serum and lymph diastases, 165.
- Parathyroid tetany, affected by nervous impulses, 311.
- , —, intestinal movements in, studied with advantage by X-ray, xxviii.
- Parthenogenesis, artificial, in vertebrates, 298.
- PEARCE, R. G. See MACLEOD and PEARCE, 419.
- Peristalsis, gastric, 250.
- Perfusion of heart and other organs, xxxi.
- Peristalsis, related to tonus, 238.
- Permeability, effect of anesthetics on, xi.
- , of muscle, 302.
- Pig, creatinine excretion, 210.
- PILCHER, J. D. See SOLLMANN and PILCHER, 100.
- Pineal body, action of extracts, 115.
- Pituitary body, secretion possibly present in cerebrospinal liquid, 64.
